ENTERPRISE ENDPOINT & MOBILITY ARCHITECT · APPLE DEVICE MANAGEMENT

Enterprise mobility architect who **built and independently owns a public-sector Apple device management practice that did not previously exist** — architecture, policy, security, compliance, and daily operations, end to end. I work in **Apple Business Manager** every day, managing the full lifecycle of ~2,600 devices across ~4,000 users, and I came up through **Apple-authorized service** before moving into enterprise endpoint management. Equal parts architect and hands-on operator, with 20+ years across frontline technical support, service leadership, and ITIL-driven IT operations. I move quickly in ambiguous, build-from-scratch environments — and lean on automation and AI to extend the reach of a one-person team — turning an unfamiliar platform into a governed, supportable program.

■ CORE COMPETENCIES

APPLE & MOBILITY	Apple Business Manager · iPhone / iPad / Mac management · Automated Device Enrollment (ADE/DEP) · Declarative Device Management · Shared iPad & kiosk modes · Configuration profiles · App & content distribution (VPP) · Apple Configurator
PLATFORM & IDENTITY	Microsoft Intune · Microsoft Entra ID · Entra shared-device mode · Cross-platform MDM (iOS, iPadOS, macOS, Android) · Endpoint compliance & hardening
LIFECYCLE & OPS	Device lifecycle, procurement → secure retirement · Carrier management (Verizon, AT&T, T-Mobile, FirstNet) · ServiceNow (ITSM) · ITIL practices · Major incident management · Documentation & end-user enablement

■ EXPERIENCE

Enterprise Endpoint & Mobility Architect (Interim Detail)

FEB 2026 — PRESENT

City of Minneapolis — Information Technology · Minneapolis, MN *(Senior Applications Analyst classification)*

- **Sole architect and owner of the City's enterprise mobility program** — a role and function that did not previously exist — spanning MDM architecture, policy, security/compliance, and daily operations across all departments for **~4,000 users and ~2,600 devices**.
- **Led the migration of a large public-safety agency (~800 users and devices)** off a siloed, department-run MDM (VMware AirWatch / Workspace ONE) into centralized, governed management — federating identity with **Managed Apple Accounts** in direct coordination with Apple, deploying on FirstNet, and securely wiping and trading in the legacy fleet to help fund the transition.
- Renegotiated carrier pricing through the consolidation, driving **~\$800K+ in savings with a single carrier alone**, plus ongoing rate reductions, retention credits, and bundled hotspots.
- Administer **Apple Business Manager** daily — automated device enrollment (ADE), app and content distribution, and account/role management for ~2,100 iPhone, iPad, and Mac devices.
- Manage iOS, iPadOS, macOS, and ~500 Android devices through **Microsoft Intune and Entra ID** — configuration profiles, declarative device management, compliance policies, and shared-device, kiosk, and Entra shared-device models.
- Engineer standardized device "packages" — case, instructions, preinstalled apps, and home-screen shortcuts to the most-requested self-service actions — so every issued device arrives fully prepared; built out the supporting request catalog and documentation.
- Embed Minnesota Government Data Practices Act (MGDPA), records-retention, and security requirements directly into platform design, in partnership with the security team.
- Lean on **automation and AI tooling as a force multiplier** for a one-person practice — accelerating scripting, documentation, and troubleshooting — while keeping the same guardrail-and-standards discipline I apply to device governance.
- Support end users directly through **ServiceNow** (incidents, requests, changes) and partner with the Service Desk to strengthen frontline troubleshooting.

IT Service Desk Manager → Information Technology Manager

SEP 2015 — FEB 2026

City of Minneapolis — Information Technology · Minneapolis, MN

- **Launched the City's in-house IT Service Desk** after 13 years of outsourced service — stood up support operations, the enterprise knowledgebase, and ITIL-aligned processes from the ground up for **4,000+ users**.
- Established and owned enterprise mobile device lifecycle and procurement, managing **~\$3M annually** in hardware and accessory purchasing.
- Built and maintained a knowledgebase supporting **450+ enterprise applications**, including 800+ City-authored articles.
- Served as 24×7×365 on-call **major incident manager** for P1 events — coordination across resolvers, root-cause analysis, and PagerDuty / ServiceNow integration.
- Led IT service-continuity (COOP) planning for major events, including **Super Bowl LII**.
- Contributed to ServiceNow platform development (Agile / UAT) and delivered ITSM training to staff and stakeholders.

Assistant Manager, Computer Services & Support

2013 – 2015

Micro Center · St. Louis Park, MN

- Led service & repair for a top-performing, **\$64M-volume** location, scaling the team from **7 to 16 technicians**.
- Ran an **Apple-authorized service operation** and led Apple **ACMT** certification across the service team.
- Cut average repair turnaround by **10 days within six months** and launched a same-day service program reaching **60% of customers**.
- Owned P&L, technician training and certification, and vendor relationships.

Services Supervisor

2011 – 2013

Geek Squad · Best Buy · Eden Prairie, MN

- Led end-to-end service performance (revenue, client satisfaction / NPS, operations) for a **30+ person team**; served as District Specialty Coach across MN / SD / ND.
- Diagnosed and repaired **macOS and Windows** systems and supported iOS, Android, and Windows end users daily — direct, plain-language customer support at volume.

Earlier: Manager in Training, T-Mobile (2013–2014) · Training-Store Assistant Manager, OfficeMax (2004–2011) — multi-unit retail leadership, certified incoming managers at a designated training store, and owned inventory control and P&L.

■ TECHNICAL TOOLBOX

APPLE	Apple Business Manager · Automated Device Enrollment (ADE/DEP) · Declarative Device Management · Configuration profiles · Shared iPad · Managed Apple Accounts · App & content distribution (VPP) · Apple Configurator · Apple Push Notification service (APNs)
MICROSOFT & IDENTITY	Microsoft Intune · Microsoft Entra ID · Entra shared-device mode · Microsoft 365
PLATFORMS	iOS · iPadOS · macOS · Android (Android Enterprise) · Windows endpoint (working knowledge)
ITSM & OPS	ServiceNow — Incident, Request, Change, Knowledge · PagerDuty · ITIL framework · Major incident management
CARRIERS	Verizon · AT&T · T-Mobile · FirstNet — provisioning, activation, plan & billing administration
AI & AUTOMATION	Microsoft Graph · scripting & policy automation · AI-assisted workflows for research, documentation, and troubleshooting (governed use)

■ HOW I WORK

- **Self-directed by default.** I assess what's needed and start, rather than waiting for direction — the City's enterprise mobility program exists because I built it with no precedent and no playbook.
- **Fast on new platforms.** I took enterprise MDM from zero to production depth on my own, then turned it into policy, standards, and repeatable operations others can rely on.
- **Support-rooted.** Two decades on the front line means I design for the end user's real experience — performance, profiles, app access — not just what looks right in the admin console.
- **Force-multiplied.** As a one-person team, I treat automation and AI like capable colleagues — extending my reach and learning curve — while staying accountable for the judgment, validation, and outcomes.

■ EDUCATION & CERTIFICATIONS

A.A.S., Business Management

Kaplan University

A.S., Criminal Justice

Pima Community College

HDI: Support Center Manager · Problem Management Professional · Knowledge Manager · Technical Support Professional

CompTIA A+

In progress: ServiceNow Administrator · BeyondTrust Administrator

■ COMMUNITY & SKILL-SHARING

Ongoing technology and small-business consulting for my community — most consistently for a family-owned Vietnamese restaurant, and for friends and neighbors, often at no charge.

- Manage business profiles across **Google Business Profile and Apple Business Connect** — brand and listing management, analytics review, and roadmap advice on what to do next.
- Integrate point-of-sale systems (Toast, Shift4, Square) with online ordering and delivery platforms (DoorDash, Uber Eats, Grubhub), including menu sync; designed and printed the restaurant's menu.
- Advise on small-business IT security — separating work and personal systems to harden security and scale access safely without risking personal accounts (the same principle behind the Managed Apple Accounts work I lead at the City).
- Use **ChatGPT, Gemini, and Claude** daily to self-train and to produce marketing assets — including social-media graphics and Vietnamese-language materials — where they extend my own skill set.

Volunteer — Habitat for Humanity International · Wings for Hope / Toys for Tots (since 2012)
